Pet Travel Checklist (Departure from Japan)

Pet owners are responsible for submitting the export application to the Animal Quarantine Service (AQS) and completing all entry procedures for the destination country.

1. Tasks for the Pet Owner (Applications & Booking)

These procedures must be done directly by the owner or pet travel agents.
The animal hospital cannot apply on your behalf.

① **Check the Entry Requirements of the Destination Country**

・Verify the latest rules on the official website of the destination's authority.

・If a specific " Health Certificate" form is required, fill in the necessary section and bring it to our clinic.Please ensure all information exactly matches your pet's records.

ex.Singapore, UK, EU

② **Submit the "Application for Export Inspection" to Japan AQS**

Apply online (via NACCS) or by FAX to the Animal Quarantine Service at your departure airport **at least 7 days before departure** (some countries require much earlier notice).

③**Airlines Booking & Pet Crate Preparation**

Note: We can prescribe oral sedatives for the flight if necessary.

2. Documents & Services Provided by Our Clinic

We will perform the necessary medical treatments and issue the required documents (Originals).
Please provide **the exact same animal information as registered or imported** if available.

① **Microchip Implantation・Certificate**

・Must comply with ISO 11784/11785 (15-digit number).

② **Health Certificate (Clinical Examination Certificate in English)**

・Issued right before departure (usually within 10 days, depending on the country).

・**Physical examination is necessary**(We must see the animal at the clinic).

・May be required for inspection at Japan AQS.

・Includes: Animal name, birth date, microchip no., sex, species, breed, body weight, color.

③ **Rabies Vaccination ・Certificate (in English)**

Product: Rabies vaccine-TC, Inactivated, 1 year-type

④**Rabies Serological Test (Original)(in English)**

・We do blood sampling, application, and sample shipping to the official lab (RIAS).

・The original report will be mailed directly to the owner.

⚠️It takes approximately 3 weeks to get the result from the date of blood sampling.

⑤**Combination Vaccination・ Certificate (in English)**

⑥**Parasite Treatment ・Certificate (in English)**

・External parasite(Fleas, ticks) medicine ingredient : Fipronil or Sarolaner

・Internal parasite(nematodes, cestodes) medicine ingredient : Praziquantel, Pyrantel-pamoate

⑦**Special blood sampling for Australian quarantine**

We do blood sampling and sample shipping to the official lab(MAFF Chubu center).

⚠️Application must be completed by a travel agent **BEFORE** blood sampling.

⚠️ **Reminder for Departure Day**

On the day of your flight, you must bring **All ORIGINAL Documents** issued by our clinic to the Animal Quarantine Service at the airport.
Photocopies will not be accepted for departure.
